- Basic Knowledge: Azure DevOps

PROJECTS

Project   : MyUL

Type   **:** Web Based Application (Angular-9, ASP.NET MVC 4.5/C# 4.0)

Team Size   : 6

Description :   MyUL is an B2C portal, which is used to certify product. Its certifications demonstrate that products have been tested to applicable standards. UL's recognized regulatory expertise provides critical credibility to authorities and the marketplace. Bring products to market more efficiently and clearly differentiate them on crowded shelves with certification from the safety science leader
.

Project   : SPARTA

Type   **:** Web Based Application (ASP.NET MVC 4.5/C# 4.0, SQL Server 2014)

Team Size   : 8

Description: SPARTA is an B2B portal, which is used as a pricing tool to enable the sales teams request quotes for distributors and getting them approved as contracts for KC(Kimberly Clark).SPARTA is integrated with salesforce for quotes creation, modification for all customers.
Currently SPARTA having pricing form build for EMEA, APAC,LAO region.

Project   : IPS

Type   **:** Web Based Application (ASP.NET, SQL Server 2012)

Team Size   : 4

Description: IPS(Integrity Packaging system) is packaging portal, which is being used by internal and external users.The external vendors should be able to securely login to internal web site to retrieve spec and packagin standards informations.only internal KC user will be able to access internal portal.IPS ave role based access to informations.

Project   : PGDNET.COM.

Type   **:** Web Based Application (ASP.NET MVC 4.5/C# 4.0, SQL Server 2012)

Team Size   : 3

Description: PGDNET is an B2B portal,wherein the diamond manufacturer list their diamonds and the other jewelers can purchase the diamonds onine.This portal provides the option to the jewelers for credit purchase, memo purchase and reserving the diamonds.Customers can request a login to this portal,the adminstrator or the manufacturer can verify their identity and credibility,everything seems to be fine then they can activate their account.Every registered user will be assigned a credit limit,so the jewelers can can

only make the orders within their credit limit.if they exceed their credit limit they have to request the administrator to increase their credit limit,otherwise they cannot place the order.

The exclusive customers will get the available stock as a feed file,where the system will cumulate all the available stock to a excel file and upload it to the jewelers FTP folder.Jewelers will read the excel file from the FTP path and place the orders.

The entire system is connected with their ERP,so all the orders,inventory,users synced with their ERP.Website is using the WCF services to communicate with ERP.

Project Title : Why compare

Environment : C#.Net (With MVC 4 and Entity Framework)

Back End : SQL Server 2012

Team Size : 4

Project Synopsis:

WhyCompare.com.au is an Australian based online telecom market comparison portal. A platform for consumer to compare telecom products such as Mobiles, Tablets, Landlines, Broadband and Pay TV from leading Providers and Manufacture like Telstra, Vodafone, Virgin Mobile, iNet, Foxtel, Fetch TV, Apple, Nokia, Samsung and may more. Application key feature includes comparing market price of products, Invite members, create groups, suggest devices & plans to members, Share, rate & review products and offers the ability to track expenditure of Users and Group. On the other hand, the application provides detailed visibility to Vendors and System Admin in-terms of statistics and reports, thus enabling providers and manufactures to measure the products in the current market.

Project Title **:** Arsco
